Hello Tre and Ken,
Brooks and Jeff brought to my attention that there may be some delay or hold-up in KAIC accessing SR property for a site walk and to review stormwater-related documents located on SR's property. I'm not sure whether there is anything I can do to help facilitate this, but I wanted to reach out to you both anyway. As you both know, ongoing cooperation is essential to planning for potential removal actions. Your clients, EPA, and the Washington Department of Ecology are all investing a lot of resources into finding an appropriate solution for stormwater at the SR property. Access to the SR property and certain documents will further the planning efforts and facilitate EPA selecting removal actions and proceeding with the settlement agreements. SR has already signed the consent for access form addressing EPA and KAIC access, with the caveat that SR would like notification of planned access so that Mr. Hothi or another representative can potentially be present on the property as well. If there are any hold-ups or delays that I can help work out, please let me know.
EPA greatly appreciates the continued cooperation of both of your clients as we work through the complexities of cleanup activities for the Former Kaiser Smelter Site.
Sincerely,
Kris
